

Training and Educational Programs for the Cyber Security Work Force

Advanced Security Technology Research Alliance
(ASTRA)

Lowcountry Cyber Security Campaign Strategy
(LCCSC)

February 12, 2009

Overview

- Learning (Training and Education) Objectives
- *Draft* Plan to provide “Training and Educational Programs for the Cyber Security Work Force”
 - Document
 - POA & M
- The way ahead

Learning (Training and Education) Objectives

- Identify regional IA training/educational opportunities and partners.
- Identify regional federal, state, and commercial stakeholders' IA/Cyber Security education/training needs.
- Provide captured IA training/educational data via an information repository.
- Work with Lowcountry Graduate Center for regional and National training/educational delivery to the local workforce of today and attract the workforce of tomorrow.
- Research regional IA training/educational opportunities/partners through networking of complementary communities.

Draft Plan and POA &M

- Purpose of the plan is to outline a potential education and training strategy for the Information Assurance and Cyber Security Centers of Excellence.
 - The strategic goal that this purpose accomplishes for ASTRA and the LCCSC is to “establish and sustain training and educational programs for cyber security work force”.
- POA & M establishes time frame and asks resources to work toward meeting this purpose and goal.

The Way Ahead

- Complete research and identify key stakeholders in the following markets:
 - Academia
 - Government
 - Commercial
- Identify funding sources to initiate obtaining a sponsor company and lead academic institution to initiate “Training and Educational Programs for the Cyber Security Work Force”.
